- "Order 20/9/50" (next to "EXPORT DEPARTMENT")

Bestmore Hammers

I N T R O D U C T I O N

We have pleasure in submitting our new leaflet of Bestmore Hammers.

It has always been our endeavour to produce tools of the highest quality to give every satisfaction to the many craftsmen who use them, and with this objective before us every attention is given to design, balance and finish of every pattern Hammer.

New precision machines are installed to produce the Ballpane Engineers Hammers and these machines enable us to market this Hammer in a true machine turned finish. This operation not only makes each Hammer perfect in shape but also produces every one of identical size in the Ball and Head and also of a very fine high polish finish.

All Hammers are now fitted with cellulosed Handles and each carries the well known Bestmore Label and guarantee.

Each Hammer is inspected and tested before despatch (and any Hammer proving faulty in use will be replaced immediately free of charge).

All Hammers are packed in strong cardboard cartons and labelled with a full description of its contents.

In submitting this list to you we have every confidence that we can give you the " RIGHT TOOL " for the job and we trust that this list will help you in selecting the correct Hammers for your requirements.

We trust that we may be favoured with your orders which will have immediate attention as stocks are carried of all sizes.
